Max Temperatures Friday

Valid 7am-7pm Friday

Weather Forecast Office
New Orleans, LA
Issued Sep 22, 2022 10:48 AM CDT

Source: Eri, Maxar, GeoEye, Earthstar Geographics, CNES/Airbus DS, USDA, USGS, AeroGRID, IGN, and the GIS User Community

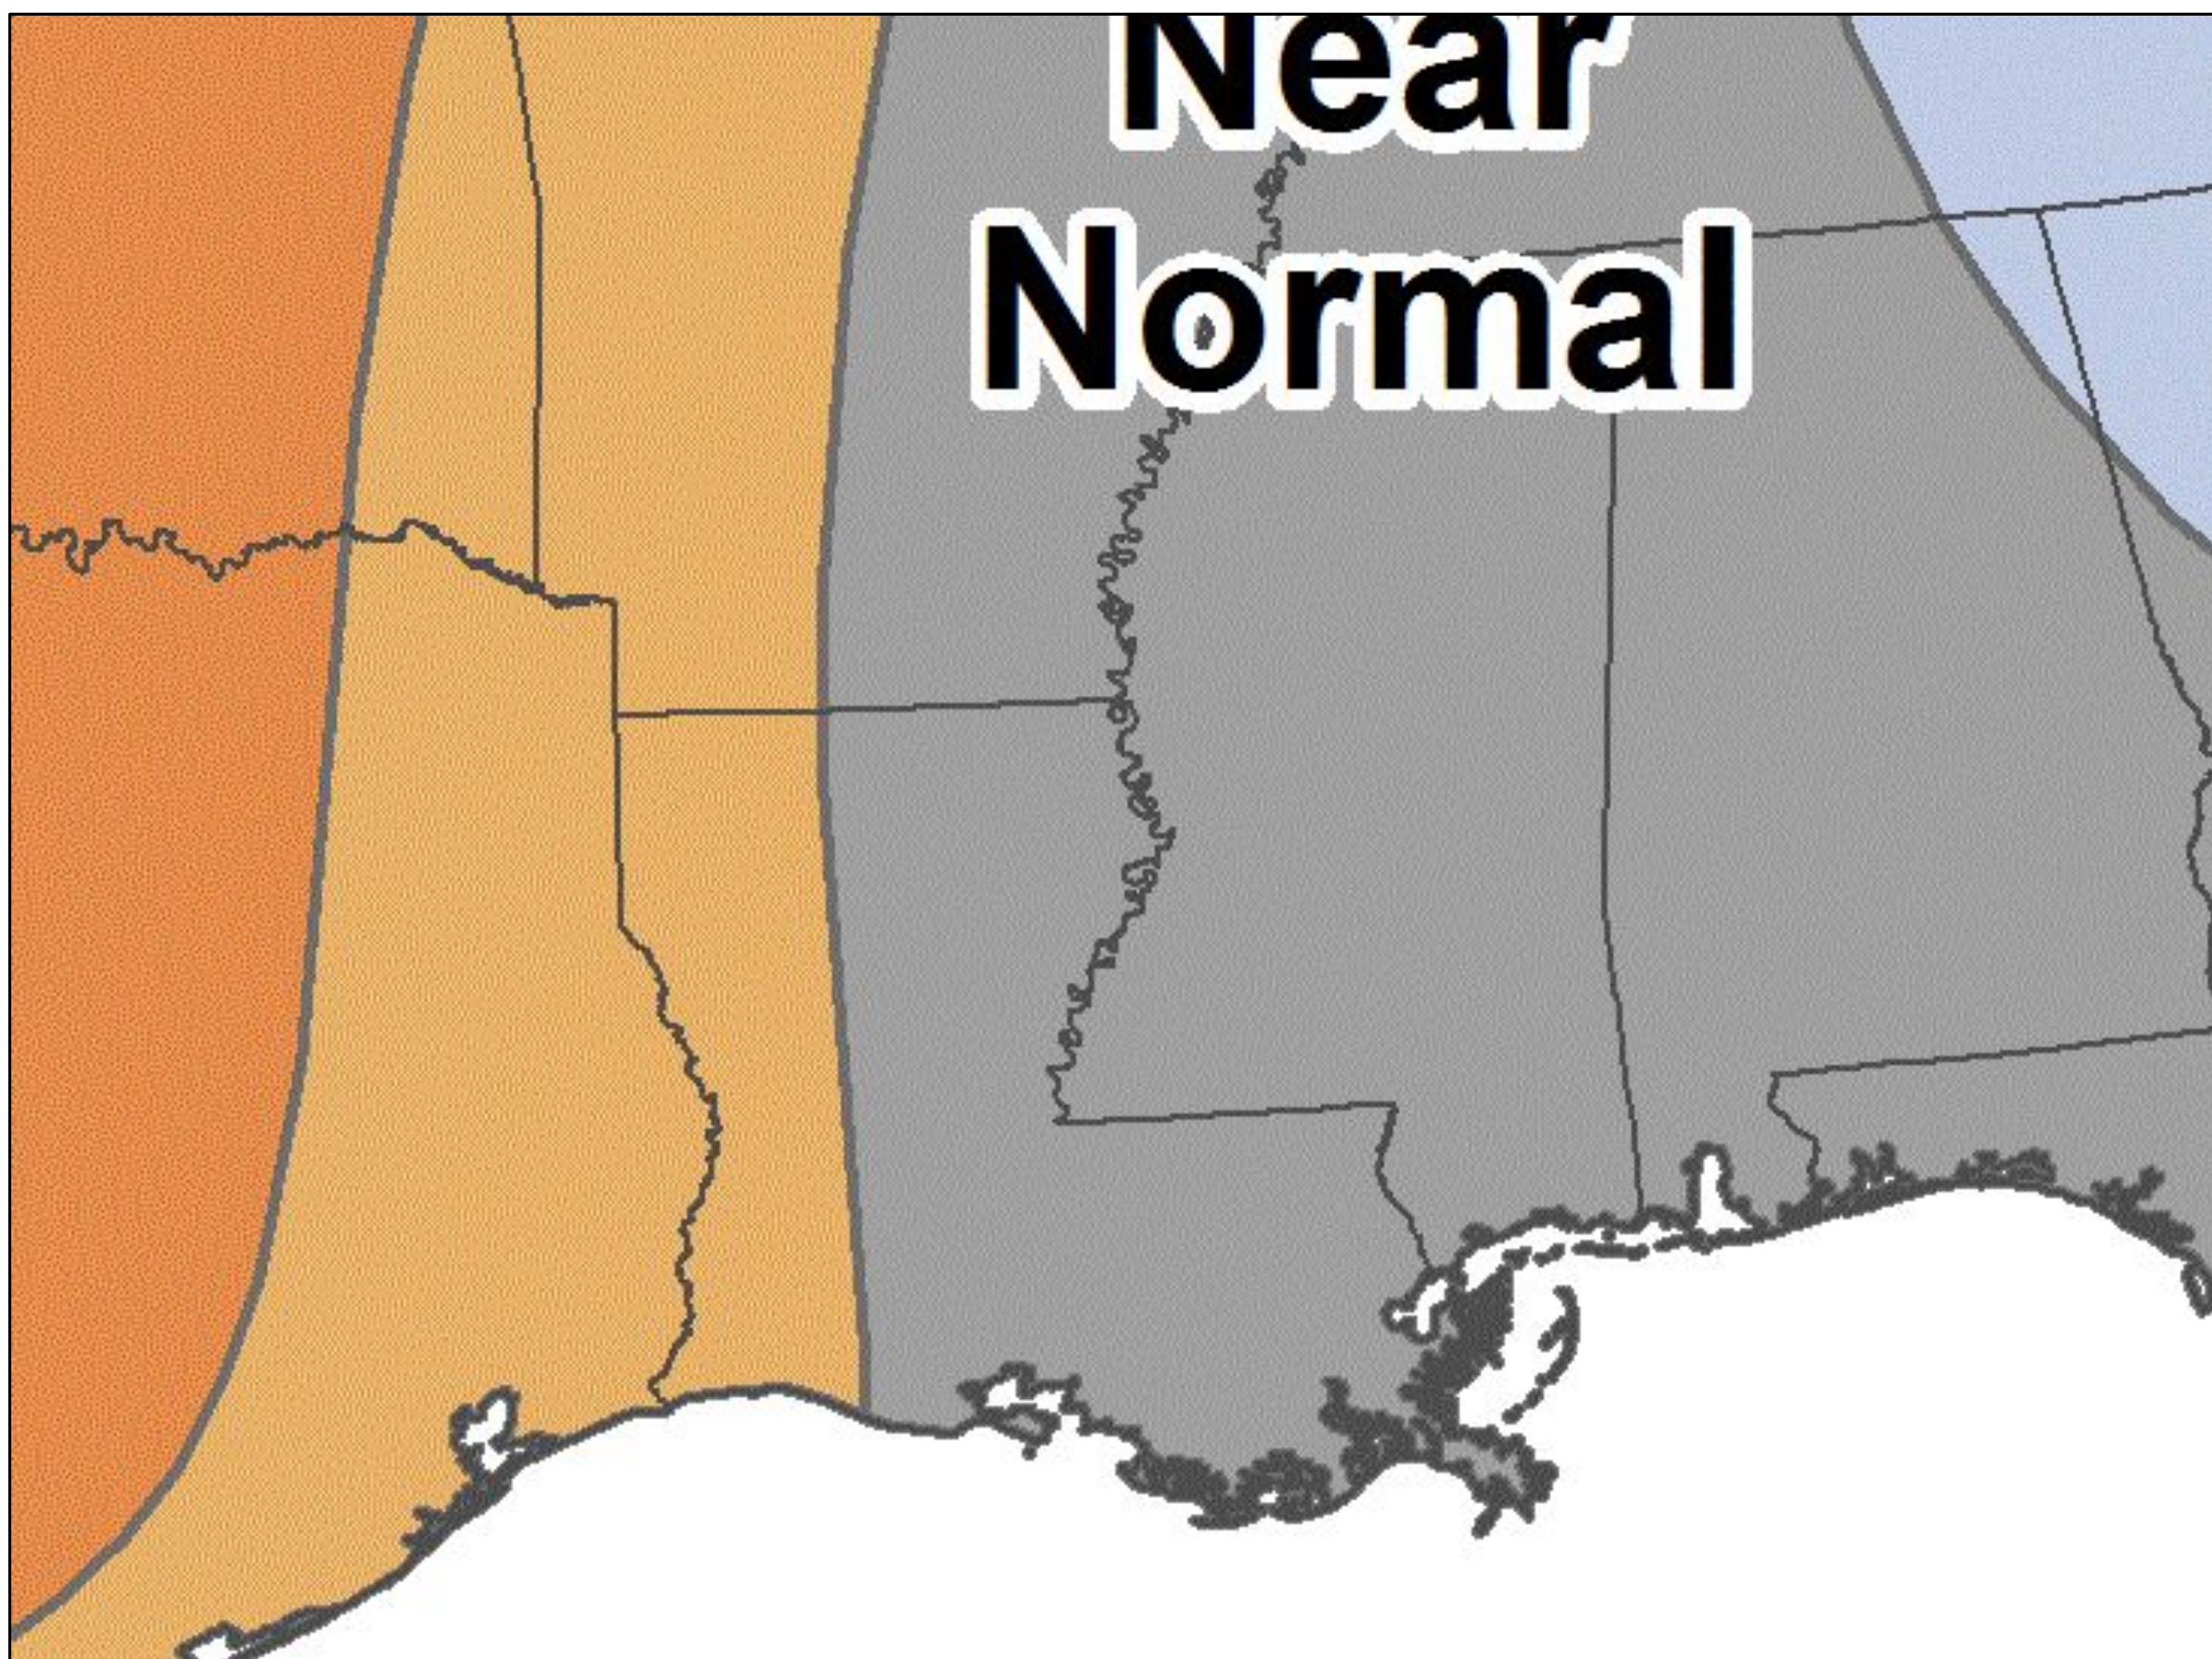

NWSNew Orleans

weather.gov/neworleans

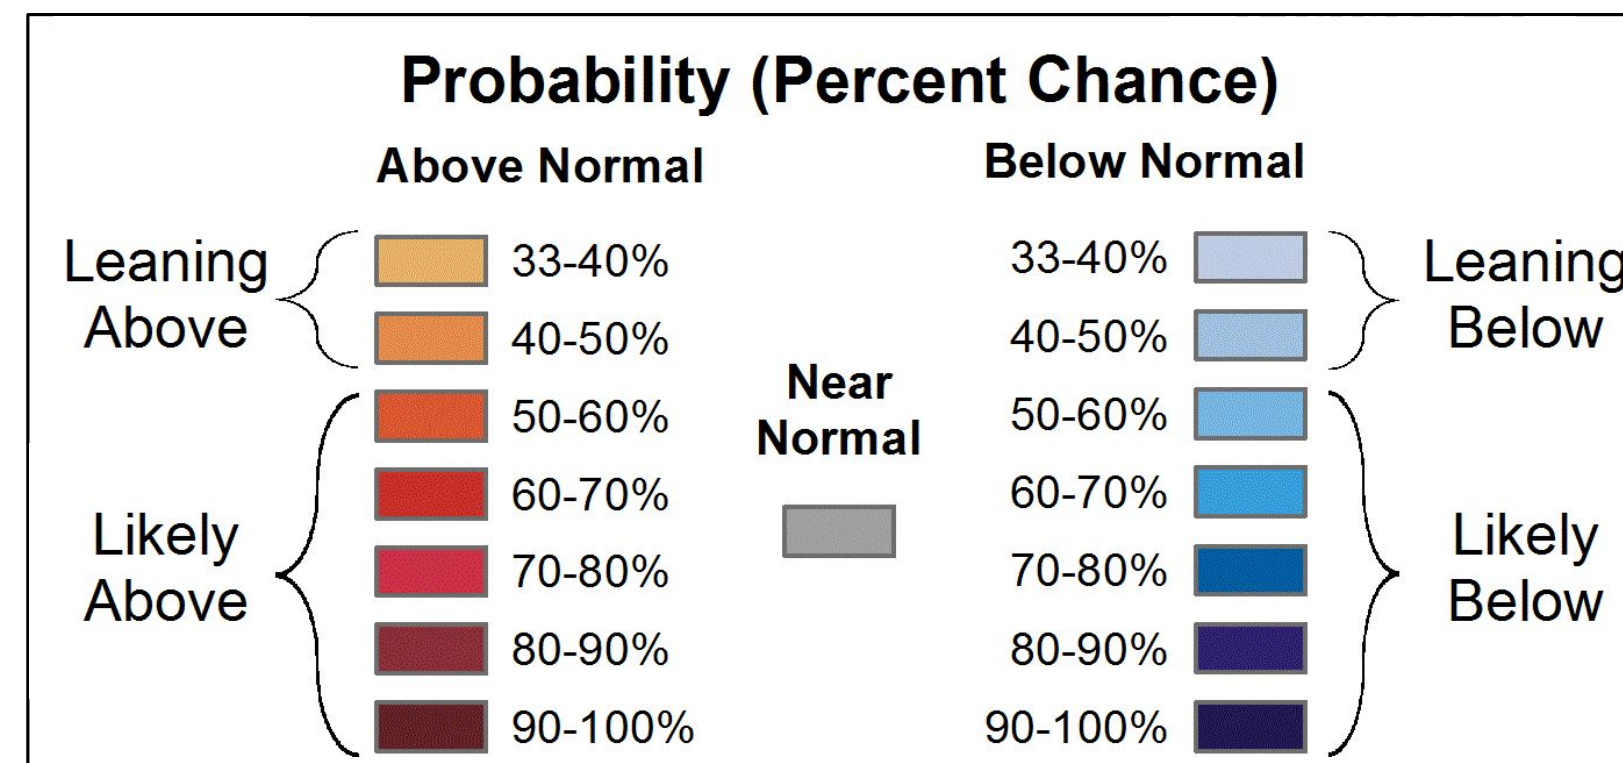

- Hot temperatures expected today and Friday with most areas in the 90s. Luckily the humidity is not too oppressive, so Heat Index values don't break 105F.

Day 6-10 Temperature Outlook

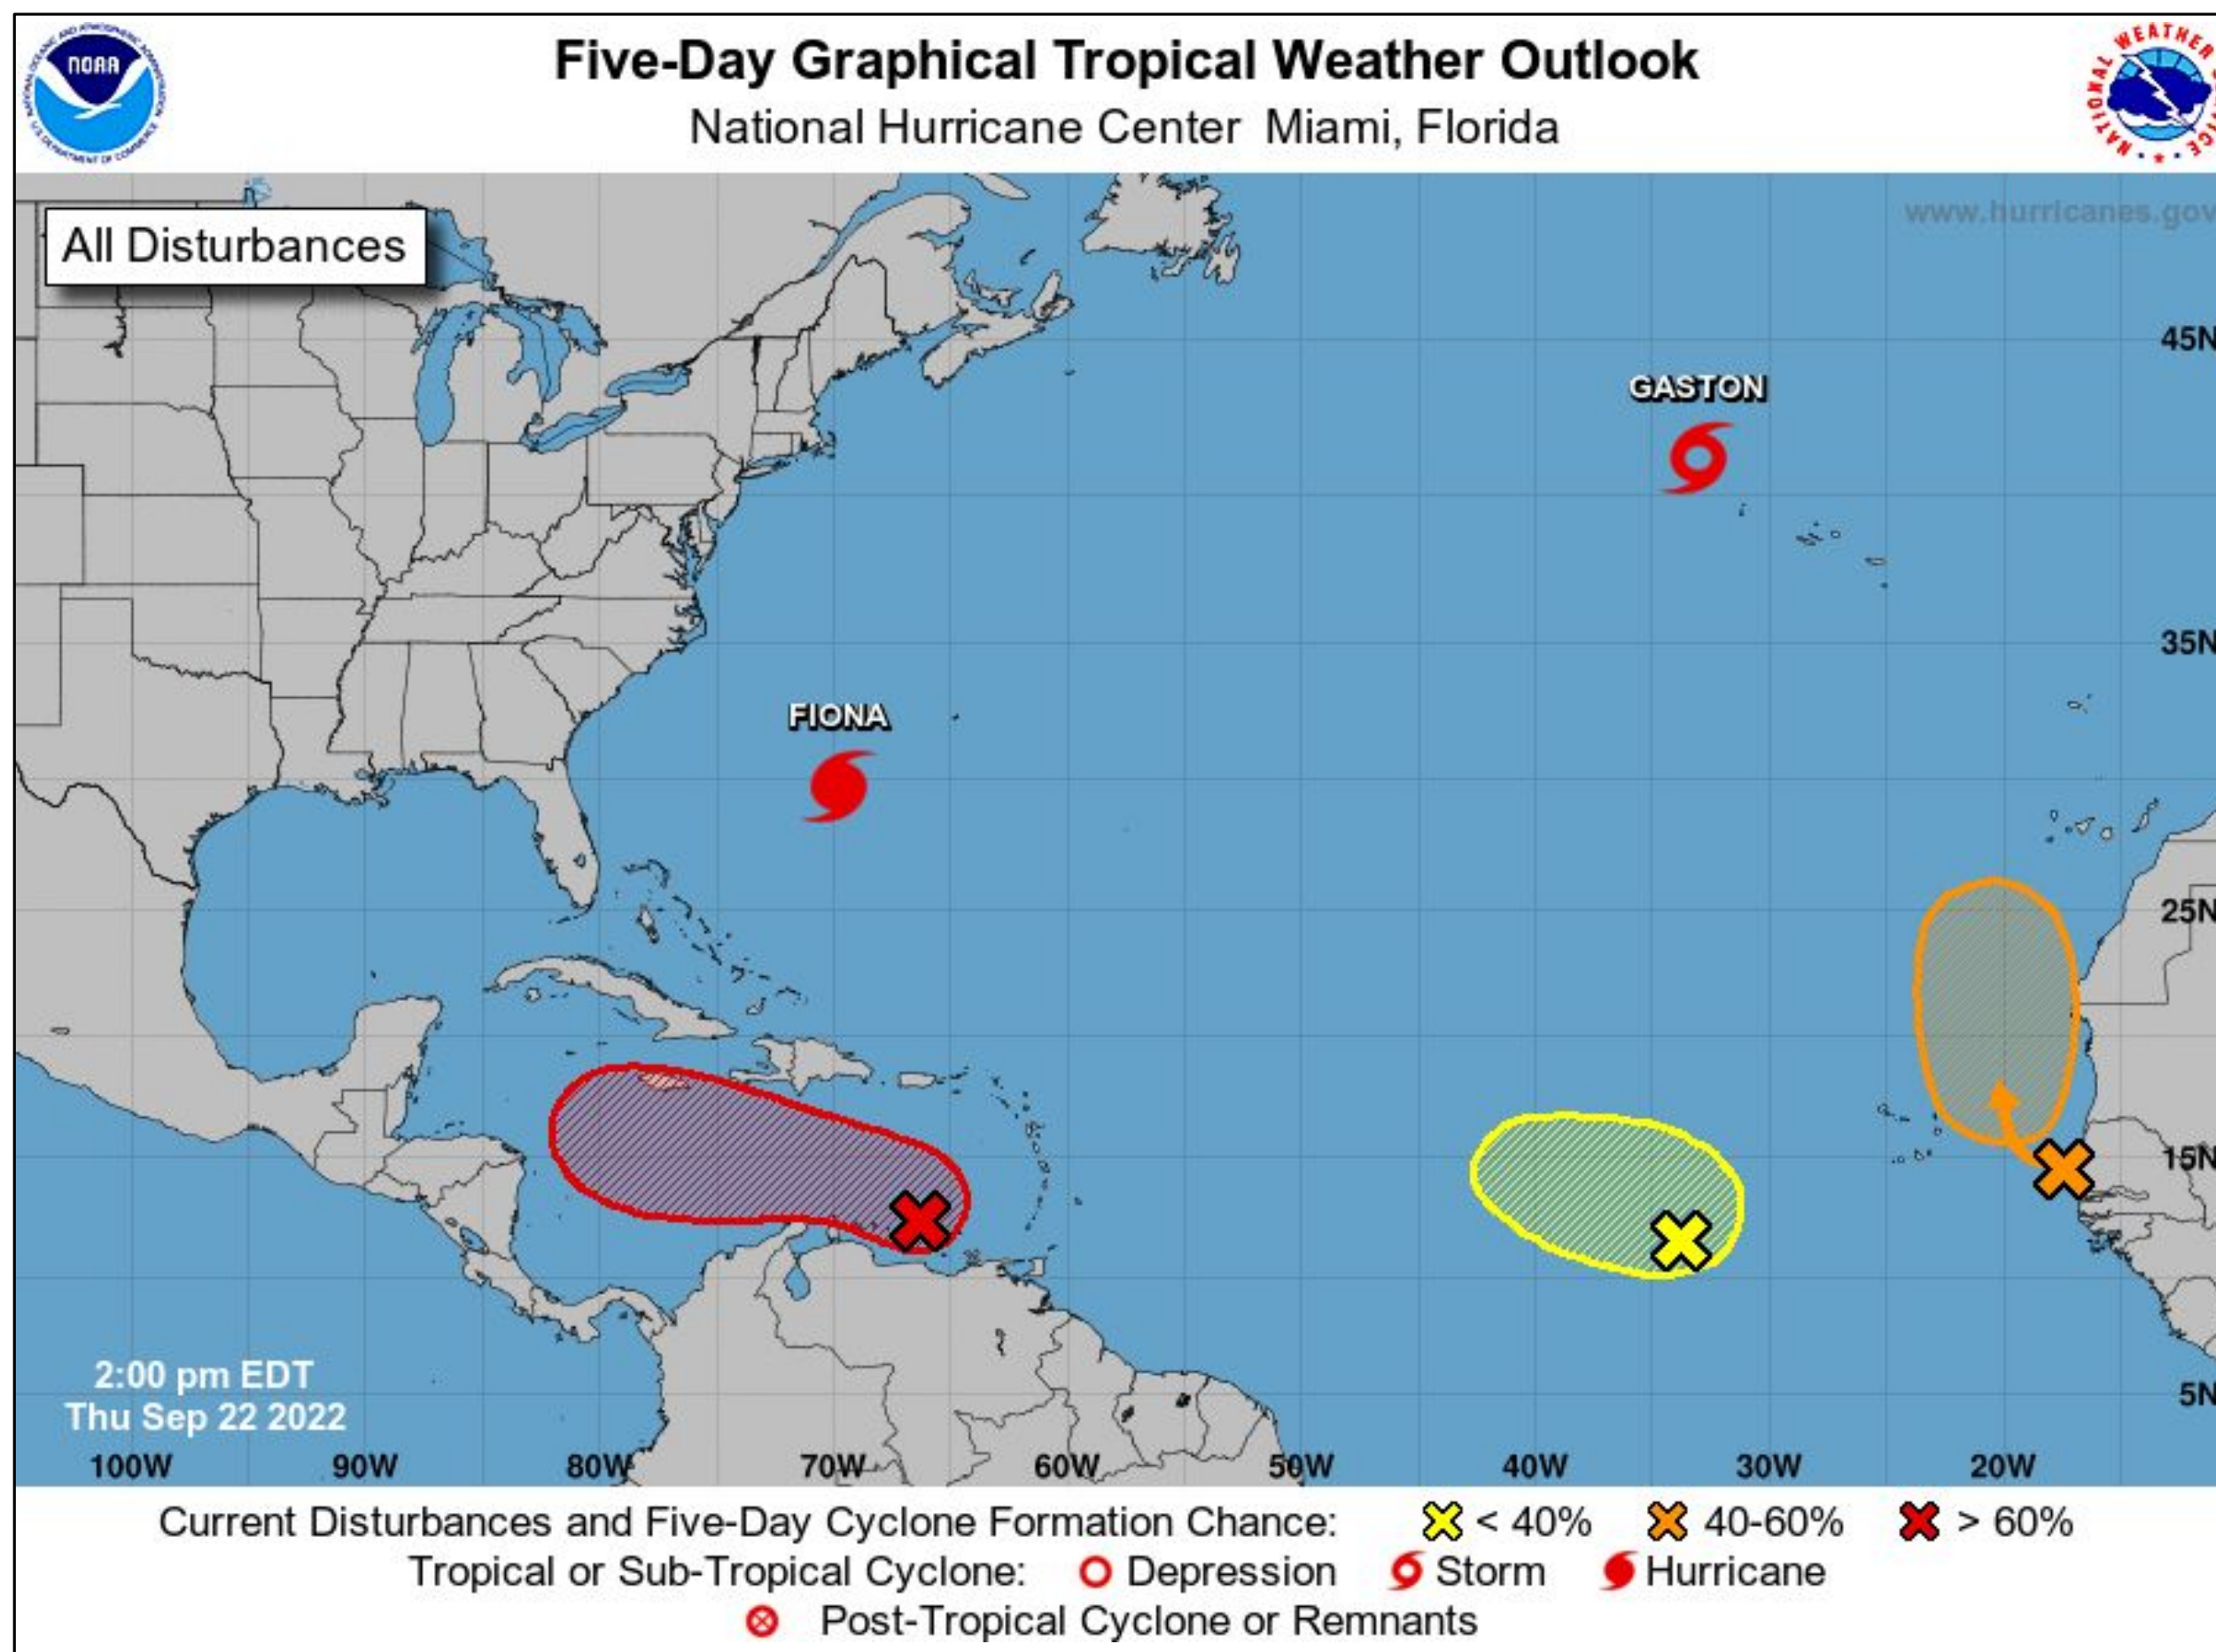

- It has been hot this week and this will continue through Sunday, then trending back towards normal temperatures

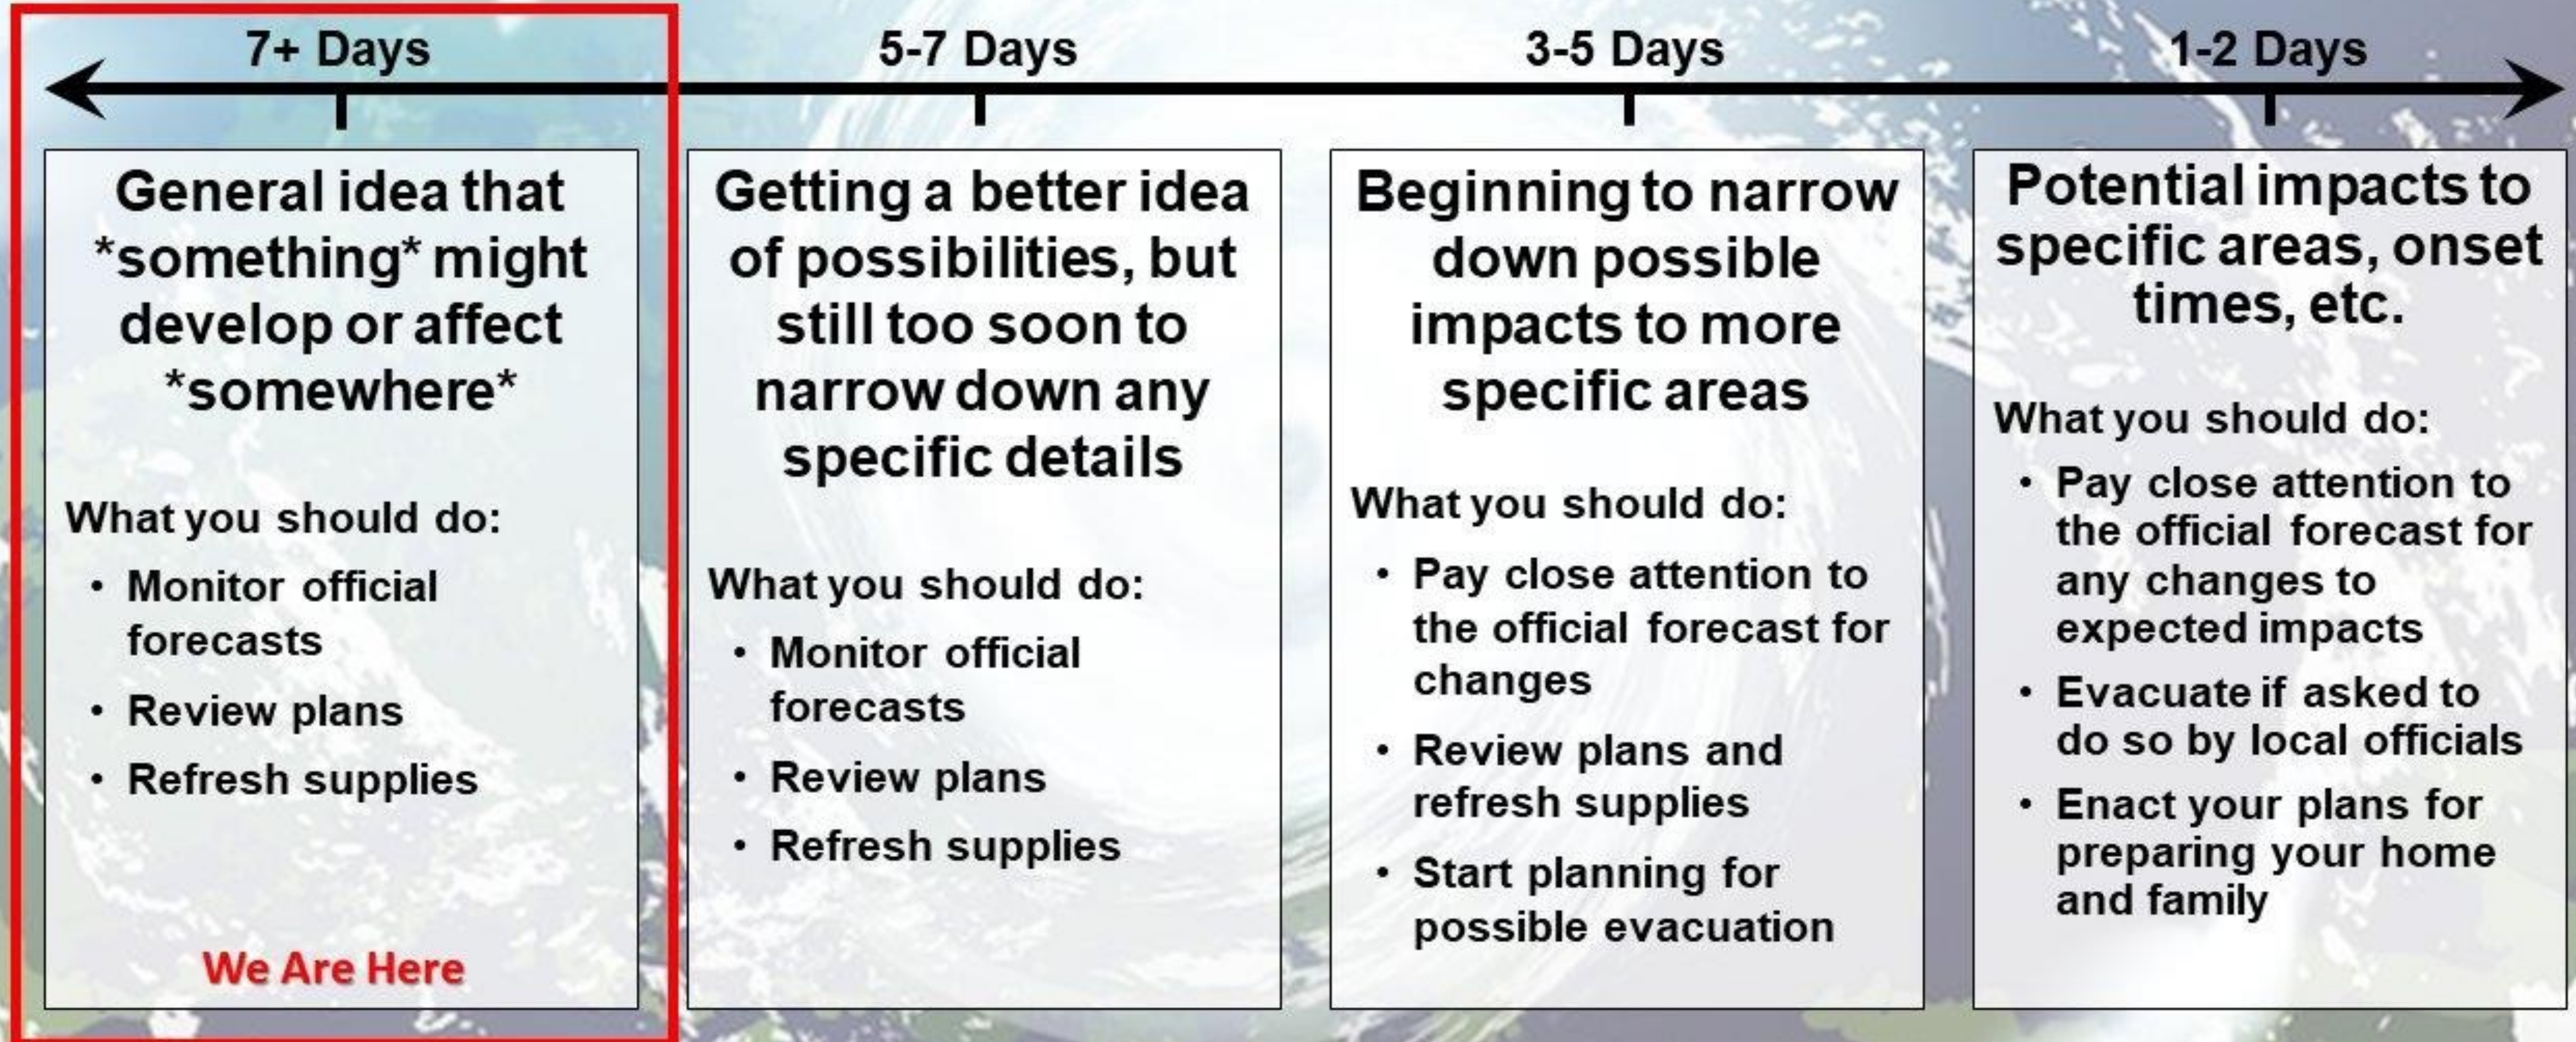

Tropical Weather Outlook

- Tropics are active
- Closely watching the disturbance (98L) expected to move into the Caribbean but we are still too far out to know any specifics.

What details can you **REASONABLY** expect from a hurricane forecast this far out?

Summary of Impacts

- Hot for another couple days, then trending down some
- Tropics are active, but no threats for at least 7 days
 - It is still too far in advance to know where disturbance 98L will go, once an actual storm forms we will start to get more specific details
