T.P. Ordinance No. 18-26

AN ORDINANCE AMENDING TANGIPAHOA PARISH SUBDIVISION REGULATIONS ON VARIOUS REQUIREMENTS AND ALLOWING THOSE REQUIREMENTS TO BECOME CODIFIED

BE IT ORDAINED by the Tangipahoa Parish Council-President Government, governing authority of Tangipahoa Parish, State of Louisiana that the Tangipahoa Parish Subdivision Regulations be hereby amended as follows:

Article 4. - COMMERCIAL DEVELOPMENTS

Sec. 17-5.1 – General Provisions

Commercial property developments include but are not limited to all of the following: hotel, motel, R.V., rental property (residential and business), religious, non-profit, public projects, institutional, and industrial developments (schools, hospitals, manufacturing plants, shopping centers, etc.) and will be referred to here forward as “development(s)” in this section.

All developers of these developments are required to prepare a preliminary site plan, drainage and/or floodplain impact study, and construction plans, (when applicable), and a site plan detailed for construction (asphalt or concrete pavement section, grading, drainage and/or floodplain, sewerage facilities, utilities, etc.) of proposed improvements to submit to the planning department for consideration during a Technical Review meeting with department staff. The drainage and/or floodplain impact study and/or traffic impact study may be waived by the planning department upon written request by developer and signature approval of the district councilman where the proposed development is located. However, these studies may still be required by the Planning Commission before approval is granted.

Prior to the filing of an application for consideration by the parish planning commission, a representative(s) for the developer is required to have an informal Technical Review meeting with the director, parish engineer/drainage district director and parish staff/officials deemed appropriate in an effort to resolve technical matters regarding the proposed development prior to consideration by the planning commission.

Upon receipt of the preliminary site plan, and any required studies, the development may be placed on the planning commission agenda for a public hearing. After the planning commission has held a public hearing they will approve, defer or deny the proposed plans. Once preliminary plans are approved, the construction plans (if applicable) may be submitted to the parish engineer/drainage district director and the parish building official for review and approval signatures.

If a proposed development is to be located on a corner lot where one side fronts onto a parish road and another side fronts onto a state highway, the entrance and exits must be located onto the state highway. A waiver for this requirement may be requested by the developer. To be considered for this waiver, the Office of Community Development must receive a written request from the developer. Once request is received, an approval signature of the district councilman where the proposed development is to be located must be obtained before a waiver may be granted.

Once all requested impact studies, infrastructure construction plans along with a stormwater management plan and a final site plan are approved can the site construction begin. Approval for site construction shall expire after twelve (12) months unless extended by the planning commission.

Once site plan approval has been obtained, a building plan review must be conducted and fire marshal life safety letter must be provided to the parish building official. Certificate of occupancy may not be given unless all phases of on-site inspections of the structure has been made by representatives of the parish and approved by the parish building official.

Any change in usage of commercial property shall be submitted to show proposed usage to the parish engineer/drainage district director, the parish building official and community development director for approval. Any of these parish representatives may require and enforce eight-foot high solid fencing for commercial developments.

Additions or modifications to existing commercial developments may qualify for an exemption from the requirement for preparing a drainage and/or floodplain impact study, depending upon the projected flood hazards and approval by the parish engineer/drainage district director, the parish floodplain administrator and community development director. Additions or modifications may also have the required traffic impact study waived administratively upon approval of the parish engineer, the parish building official and community development. All waiver requests must have the signature approval of the district councilman where the development is located.

Sec. 17-5.2 - Commercial Development Buffer Areas.

- (a) A minimum of twenty-five-foot buffer area shall be established and maintained between conflicting uses caused by the location of a new developments or adjacent to the property being used for residential purposes unless approved by the parish council. No building or permanent structure shall be located within this buffer area. The buffer area may be used for parking, underground utilities, drainage, green area (landscaping and planting) and access.
- (b) The buffer area shall be established and maintained by the owner of the property on which the new developments are established.
- (c) The buffer area shall also have an eight-foot high solid fence or other approved barrier, between the residential and these developments. This fence shall be located within one (1) foot of the property line unless approved by the community development director.
- (d) The twenty-five-foot buffer area and eight-foot fence or other approved barrier requirements shall be waived if all adjacent landowners to the required buffer area submit a notarized letter of no objection.

Sec. 17-5.3 - Commercial development notifications.

At least forty-five (45) days prior to the planning commission meeting at which approval is being sought, the developer shall erect a four-foot by eight-foot black and white sign with a minimum of four-inch high letters located with no obstructions within twenty-five (25) feet of each public right-of-way on which the tract of the proposed development fronts. The bottom of the sign shall be at least four (4) feet from the ground. Twenty-five (25) percent of the sign may be dedicated for advertising purposes and graphics, provided such area is contiguous. The sign shall be erected at least forty-five (45) days prior to the planning commission meeting at which the development is to be considered. The sign shall be titled "A Commercial Development Is Proposed For This Site" and shall contain the following information:

- (1) Name, address and phone number of developer.
- (2) Name of development or complex.
- (3) Number of proposed commercial units.
- (4) Number of acres in the development.

Sec. 17-5.4 - Commercial development submittals.

The following plans and impact studies must be received by the Office of Community Development - Planning Department and the parish engineer/drainage district director's office forty-five (45) days prior to the planning commission meeting in order for the development to be placed on the planning commission agenda for consideration.

- (1) Preliminary site plan.
- (2) Traffic impact study - (May be waived).
- (3) Drainage and/or floodplain impact study - (May be waived).
- (4) Fire district impact - Proposed construction located in a parish fire district must submit a copy of the preliminary site plan and construction plans showing detailed drawings for the proposed commercial development at the same time as other required submittals. A response letter from the fire district must be provided to the department prior to the commission meeting.

Sec. 17-5.5 - Commercial development exemptions

Any new commercial developments that are relatively small in size may have the above requirements (sections 17-5.1 to 17-5.4) reviewed administratively at the discretion of the parish engineer/drainage district director, parish building official and the community development director. For developments to be considered for administrative approval, the Office of Community Development must receive a written request from the developer and the signature of the district councilman where the proposed development is to be located.

BE IT FURTHER ORDAINED that this ordinance shall become effective immediately upon adoption of the TPC and signature of the Parish President.

S/Kristen Pecararo, Clerk
Tangipahoa Parish Council

S/Bobby Cortez, Chairman
Tangipahoa Parish Council

S/Robby Miller, President
Tangipahoa Parish
